

PRESS RELEASE – Ref UNI: 005

FEATURE TITLE: **UNIMAQ Appoints MEMAG Global Technologies as official agent for P.R. China**

RELEASE DATE: **Wednesday 14th November 2012**

As part of the growth plans in the Asian market and China in particular UNIMAQ has announced the appointment of MEMAG Global Technologies as the company's official agent for its products and services in the Chinese market.

The agreement was recently signed in Beijing by Mr. Berty De Jong, Director of Unimaq and Mr. Michael Cheng, Managing Director of MEMAG.

MEMAG Global Technologies is a Beijing based company with extensive experience in canmaking and has been the official agent for other overseas companies in China for the past few years.

“We at Unimaq are really happy to announce this agreement which strengthens our plans to offer canmakers in China a more dedicated and direct access to our products and services. We feel having found the perfect partner and appreciate MEMAG's experience and knowledge of canmaking”, Mr. De Jong said.

Mr. Michael Cheng, Managing Director at MEMAG admitted “being extremely excited about this agency agreement and happy to have the opportunity to work alongside one of the fastest growing companies in canmaking with a real focus on innovation, long term market commitment and focused engineering support”.

Whilst also speeding up local communications and service support, the collaboration between Unimaq and MEMAG will also dramatically improve on-site customer relationships and response times, particularly in respect of helping individual customer's develop their own and very often local can making, processing and market growth needs.

This agency agreement follows the opening of Unimaq's new office in Bangkok, Thailand, back in February this year, which has been set-up to give their Asian based customers, far greater access to Unimaq's 'Can Decorating' technologies, product development and engineering facilities.
